Professional Summary

Experienced **iOS Senior Software Engineer with 9+ years** of hands-on experience in designing, developing, and delivering high-quality iOS applications. Previously led the iOS team at **Easy Trip Planners Ltd.**, contributing to large-scale, high-traffic travel applications with a focus on scalable architecture, performance, and product quality.

Proven track record of delivering **10+ iOS applications** across travel, e-commerce, and fintech domains from development to App Store release. Skilled in **Swift, Objective-C, UIKit, SwiftUI, Combine, MVVM, VIPER**, third-party SDK integrations, team mentoring, code reviews, and cross-functional collaboration in Agile environments.

Technical Skills

Languages: Swift, Objective-C

iOS Frameworks: UIKit, SwiftUI, Core Data, Combine, AVFoundation, Swift Concurrency

Architecture: MVC, MVVM, VIPER, SOLID, Dependency Injection

Networking & APIs: URLSession, Alamofire, REST APIs, JSON, Deep Linking

Performance & Debugging: Memory Management, Performance Optimization, Crash Analysis, Instruments

CI/CD & Deployment: GitHub Actions, TestFlight, App Store Connect, AppCenter

Tools & Version Control: Xcode, Git, GitLab, GitHub, Bitbucket, SourceTree, CocoaPods, SPM

Integrations: Firebase, MoEngage, Netcore, Apple Pay, Razorpay, Cashfree, PayU, Amazon Pay, Paytm, MinkasuPay

Testing & Leadership: XCTest, XCUITest, Code Reviews, Mentoring, Agile/Scrum, Sprint Planning

Experience

Easy Trip Planners Ltd. (EaseMyTrip) - Senior Software Engineer

Noida, India | August 2021 – 28 July 2025

Worked across multiple iOS products within the EaseMyTrip ecosystem, leading development, architecture, feature delivery, performance optimization, and release management for native Swift-based applications.

EaseMyTrip - Travel Booking App (App Store)

- Led iOS development for the **EaseMyTrip travel booking application**, serving millions of users across flight, hotel, bus, and other travel services.
- Managed end-to-end **feature development, UI/UX enhancements, performance optimization, and production releases**.
- Implemented and maintained scalable architectures using **MVVM and VIPER**, along with third-party integrations for payments, analytics, deep linking, push notifications, and crash monitoring.
- Collaborated with Product, UI/UX, Backend, and QA teams to deliver business-critical features and ensure application quality.
- Led **code reviews, sprint planning, technical discussions, mentoring, and application optimization**, improving stability, performance, and overall user experience.

EMTDesk - Corporate Travel Management Platform (App Store)

- Contributed to the development and enhancement of the **EMTDesk iOS application using Swift, UIKit/SwiftUI, and REST APIs**, implementing business workflows, authentication, navigation, and data handling.
- Worked on **API integration, debugging, performance optimization, testing, code reviews, and production issue resolution** in collaboration with cross-functional teams.

EasyDarshan - Religious & Spiritual Travel Platform (App Store)

- Contributed to the development of the **EasyDarshan iOS application using SwiftUI**, building reusable UI components, navigation flows, and REST API integrations.
- Collaborated with **Product, Backend, UI/UX, and QA teams** to deliver features, resolve issues, optimize performance, and support production releases.

Team Leadership & Engineering Responsibilities

- Led and mentored iOS developers across multiple projects, ensuring **coding standards, code quality, and best practices**.
- Managed **task estimation, sprint planning, technical implementation, code reviews, and release activities**.
- Worked with **JIRA, Git, Bitbucket, GitHub Actions, Firebase Crashlytics, App Store Connect, and AppCenter**.

Career Break & Professional Upskilling

August 2025 – Present

- Took a career break due to **personal/family commitments** and relocated to my hometown.
- Continued hands-on upskilling in **Swift, SwiftUI, UIKit, MVVM, Combine, and Swift Concurrency** through practical projects; currently seeking **Senior iOS Developer / iOS Team Lead** opportunities.

Tycho Technologies Private Limited - Senior Software Engineer / Team Lead

Noida, India | August 2016 – May 202*1*

- Joined as **Senior Software Engineer** and contributed to the development, architecture, maintenance, and enhancement of high-traffic iOS applications.
- Promoted to **Team Lead**, taking ownership of technical implementation, project delivery, code quality, and iOS team coordination.
- Developed scalable iOS applications using **MVC and MVVM**, with a strong focus on performance, stability, and user experience.
- Led **project planning, sprint execution, task allocation, code reviews, release activities, and developer mentoring**, while collaborating with Product, UI/UX, Backend, and QA teams.

NeoU — Fitness Streaming Platform (App Store)

- Contributed to the development of a fitness streaming application offering live and on-demand workout content, developed iOS features, integrated APIs, and focused on performance and user experience.

100MB (App Store)

- Contributed to the maintenance of the 100MB Cricket iOS application, a fan-engagement platform featuring live scores, cricket news, videos, and exclusive content.
- Enhanced iOS features using Swift and UIKit, integrated REST APIs, and worked on performance optimization, bug fixing, and production releases.

Additional iOS Projects

Plan For Gift, RideBag, Flood Radar, Drink Hopper — Projects not publicly available on the App Store

Limitless Mobility Solutions - Software Engineer

Noida, India | August 2015 – April 2016

Apps: Pregnancy App, RSD Hostel

- Developed native iOS applications using **Objective-C, UIKit, and REST APIs**, focusing on UI development, debugging, and performance optimization.

Education

Madan Mohan Malviya Engineering College (MMMTU) — Gorakhpur, India
B.Tech. — Computer Science & Engineering
